**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, are drawn to a method for optimizing device performance by loading firmware module based on the based operating system type, classified in class 717, subclass 168.
- II. Claims 19-30, are drawn to a method for restoring a corrupted data structure with device self stored repair tools, classified in class 714, subclass 5

The inventions are distinct, each other because of the following reasons:

Invention Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instance case, invention Group I has separate utility such as providing a manner for loading a firmware module based on the saved type, while the invention of Group II has separate utility such as providing a method/application for restoring a corrupted operating systems with device self stored repair tools. See M.P.E.P. 806.05(d).

Because these inventions are independent or distinct for the reason given above, the inventions acquire a separate status in the art in view of their different classifications and also require different fields of search for Group I and Group II (See M.P.E.P. 808.02), restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Kevin West (Reg# 43,983) on 03/26/2006 to request an oral election to the above restriction requirement, but the examiner was told that the attorney is no longer with the law firm. Mr. Chad Swantz(Reg#46329) returned the phone call, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103 (a) of the other invention.

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zheng Wei whose telephone number is (571) 270-1059. The examiner can normally be reached on Monday-Thursday 8:00-15:00.
